

10 Simple Bible Questions:

1. What happened to the Dinosaurs? *They died. They were called dragons in the Bible. See Job 40:15-41:34, Psalm 104:26, Deuteronomy 32:33, Micah 1:8, Isaiah 27:1, 51:9...* (Note: the largest animal **ever** to live is still around--the blue whale.)
2. What about continental drift? *There may have been one level continent originally. Genesis 10:25 says that in Peleg's day ("peleg" means earthquake) the earth was divided.*
3. What about the Ice Age? *We're probably still in it as a result of the Flood. If it was gradual, why do we find "snap freezing?"*
4. Why are there poisonous plants & creatures? *Death, suffering, pain.... result from disobedience to God. Genesis 3:11-19. A restoration of creation is mentioned in Romans 8:18-23.*
5. Why are there 3 major "races"? *There's really one race--mankind. The earth was repopulated by Noah's 3 sons. See Genesis 10:1.*
6. Genesis 1:10-18 says the earth & plants were created before the sun. How did the plants live? *This is not a problem if you believe the days were 24 hour days. But , sunlight is not the first or the last source of light, according to Revelation 22:5*
7. How can starlight that is light-years away reach us if it is a young earth? *A general relativity-based model implies gravitational time-dilation. See Isaiah 40:22.*
8. How did all the animals fit on the Ark? *The Ark was about 450' long, 45' high and 75' wide, (comparable to the Titanic) easily able to carry the necessary 16,000 or so animals plus food.*
9. Genesis 5 records people living to be over 900 years old. How could that be? *There may have been a pre-diluvian atmospheric ultraviolet filter, see Genesis 1:7 & 2:6. Post-flood conditions also may have contributed to genetic code degeneration.*
10. Where did Cain get his wife? *His family (Genesis 5:4). Before the Mosaic Law, close relatives intermarried (Genesis 20:12) since there would have been fewer genetic mutations at that time.*

EVOLUTION MYTHOLOGY

Did you ever wonder how **intelligent** people like Socrates, Aristotle, Plato, Alexander the Great, Hippocrates and Pythagoras believed in mythology? Did you ever wonder why they did not challenge the conventional belief in "the gods?"

Perhaps the answer is that "one's morality dictates his theology" (*and vice versa*). That's why decadent societies choose to believe nonsense (*something that makes no sense*). Greek mythology did not make sense. **Yet brilliant people accepted it!**

There's a **20th century myth** that is also **non-sense**: The Theory of Evolution. It's taught in every government funded institution. And there are brilliant people who accept it as fact. But it has been elevated to that status by imagination, speculation and conjecture (*even when observable scientific evidence refutes it*).

Evolution mythology, **like** Greek mythology, has a TRINITY of major players:
TIME, ENERGY & CHANCE.

" **PROFESSING THEMSELVES TO BE WISE, THEY BECAME FOOLS...**"
(ROMANS 1:22)

Time

How old is the earth?
Evolutionist's Answer:
4.5(?) Billion Years

Dating method:	Some of the many Inconsistencies:
K-Ar dating	by this method 100 year old lava was dated at 3,000,000,000 years old ¹
Ar-Ar	volcanic rocks are known to contain excess Ar ²
U-Th-Pb dating	Pb has demonstrated to be affected by weathering ³
Stratigraphic	Glacier National Park layers are upside down ⁴

¹⁴C, or radiocarbon, dating is not used to date specimens thought to be millions of years old--only young specimens

More Major Problems:

1) **ALL of these dating methods ASSUME that there has NEVER been a GLOBAL flood.**

*(138 civilizations have a global flood in their folklore)*⁵

There would have been a much higher rate of radioisotope decay and an imbalance of carbon immediately following a global flood. This realization is spawning new research in: radiohalos, fission tracks, nuclear decay theory, isochron discordance and helium diffusion.

2) **Some scientific evidence that fits the model of a much younger earth with a global flood:**⁶

- oceans gain 450 million tons of sodium per year
- earth's magnetic field decreases by a factor of 2.7 each 1,000 years
- radiohalos indicate the Jurassic, Triassic, and Eocene formations in Colorado were deposited within months of each other
- there are numerous out-of-sequence fossils
- continents are eroding too quickly
- not enough helium is in the earth's atmosphere, too much helium is in hot rocks
- multi-layered fossils straddle too many strata
- rapid deposition of fine-grained sedimentation observed after Mt. St. Helens erupted in 1980⁷
- red blood cells have been found in dinosaur bone, *(DNA doesn't last longer than thousands of years)*⁸

3) **When dating methods yield conflicting results, dates are selected that fit an 'old earth' model.**

Micro-"Evolution" (*wolves to dogs*)
Natural Selection (*the variation which is observable among all living species*) is being referred to as "**Micro-Evolution.**"
This requires **NO NEW GENETIC** information.

Macro-Evolution (*cows to whales*)
The Theory of Evolution, proposed by Charles Darwin in his "On the Origin of Species by Means of Natural Selection or the **Preservation of Favoured Races** in the Struggle for Life," speculates that Natural Selection can bring about **NEW & IMPROVED GENETIC** information.

Chance

Where did life come from?
Evolutionist's Answer:
the basic elements

By means of:
Spontaneous Generation
*(disproved by Louis Pasteur)*⁹

Major Problems:

1) **ALL experimental attempts to create life in an atmosphere with oxygen have failed.**

*(The 1952-53 Miller-Urey experiment left out oxygen, and did not really create "life" anyway.)*¹⁰

2) **The probability of life originating by chance in a primeval soup is 1 chance in 10^{4,478,296} or (statistically speaking) impossible.**¹¹

Germ Evolution?

Bacterial resistance to antibiotics is often introduced as evidence of "evolution" when, in fact, the **resistance has been demonstrated to have been there beforehand** and merely

Energy

Where did people come from?
Evolutionist's Answer:
lower life forms

By means of:
Random Mutations Producing Improvements
violates 2nd Law of Thermodynamics
*(undirected energy in open or closed systems always tends toward disorder)*¹³

Examples used: Lesser-known facts:

Ape-Men?

Neanderthal	extinct tribes of humans with larger brains ¹⁴
Pittdown	ape jaw, teeth filed to look human ¹⁵
Nebraska	made from 1 tooth, later found to be pig
Peking	none remain, human fossils found at same site ¹⁶
Lucy	human fossils found lower down in strata ¹⁷

Fish-Amphibians?

Coelacanth	not extinct, "feet" are really just fins ¹⁸
Rhipidistia (swim bladder "lungs")	some modern true fish have lungs ¹⁹

Cow-Whales?

Ambulocetus	fragments found above true whale fossils ²⁰
Basilosaurus	a fully aquatic whale, not ambulatory ²¹
Pakicetus (walking whale?)	only the jaw and skull found ²²

Amphibian-Reptile?

Seymouria	dated 30 million years younger than true reptiles ²³
-----------	---

Reptile-Bird?

Archaeopteryx	fully bird (and scales can't become feathers) ²⁴
---------------	---

Dinosaur-Birds?

Sinosauropteryx	lacked embryonic thumb necessary & "feather" traces were only frayed collagen ²⁵
Archaeoraptor	combination of 2 different creatures (fraud)

More Major Problems:

- Mutations cause a loss of genetic information.**²⁶
(Mutations are 99.99% harmful.)
- "Evolutionary transitions" do not exist.**²⁷
(That's why they're called "missing" links.)
- DNA sequencing doesn't fit an evolutionary model.**
*(turtle DNA is much too advanced...)*²⁸
- Living creatures have great anatomical variety.**
(the platypus lays egg--like a bird, but nurses it's young--like a mammal...)
- Many living creatures share common features.**
(bats look like winged rats, but they aren't)
